

INSIDE LOOP

School assemblies and workshops

Yo-Yo masters Arron Sparks and Sam Veale present this unique schools package for pupils of all ages. A fun and informative assembly, followed by workshops for every class.

The day begins with a interactive 30-minute assembly featuring the history, physics and technology of the Yo-Yo as well as an amazing display of Yo-Yo trickery.

“Sam was brilliant! Had a great rapport with his audience! Was careful to explain instructions to children and was friendly! His tricks had the whole school in awe and amazement! Thanks!”

Cobham Primary School, November 2009.

Inspired pupils will then get a chance to try out Yo-Yo for themselves in a workshop lead by Arron and Sam (teachers can join in too!).

Yo-Yo improves fine motor skills and co-ordination. It also underlines the importance of focus, patience and practice and is a fun and inclusive activity.
